  morphological characteristics, 885
  seasonal influences, 881
  task performance, 287
Acetylcholine
  pressor response, lung, 1086
Acid-base balance
  acclimatization to altitude, 319
  acclimatization to carbon dioxide, 48
  ventilatory exchange ratio, 644
Acidosis, metabolic
  heart rate, 1151
  severe exercise, 243
Acidosis, respiratory
  compensation, 48
Adams, T., 338
Adamsons, K., Jr., 897, 1100
Adaptation to altitude
  aging, 21, 431, 483
  basal metabolism, 949
  cardiac output, 441
  exercise, 431, 441, 483
  heart rate, 441
  oxygen consumption, 431, 441, 483
  oxygen transport systems, 431
  pulmonary ventilation, 431
  respiratory exchange ratio, 431
  stroke volume, 441
Adaptation to cold
  adrenergic response, 9
  body temperature, 593
  body weight, 593
  heat balance, 9
  hypnosis, 1043
  metabolic rate, 593
  peripheral circulation, 9
  skin temperature, 9, 593
  tissue insulation, 593
  vasomotor response, 593
Adaptation to heat
  acclimatized males, 598, 1051
  ethnic differences, 1051, 1055
Adding performance
  raised body temperature, 287
Adipose tissue
  environmental temperature, 863
  exercise, 619
  free fatty acid production, 619
Adolescents
  athletic conditioning, 629
  heart rates during exercise, 853
Adrenergic response
  adaptation to cold, 9
Aging
  adaptation to altitude, 21, 431, 483
  exercise tolerance, 483
  oxygen intake, 483
Agostoni, E., 408
Air-displacement method
  body volume, 955
Airflow resistance
  alveolar carbon dioxide tension, 745
  chest wall, 653
  histamine, 803
  hypovolemic shock, 679
  lower airway, 653
  lung volumes, 1059
  measurements, 176, 813
  mouth and nose breathing, 653
  pulmonary tissue, 653, 813
  respiratory phase, 653
  thoracic gas volume, 1059
Airway conductance
  lung volumes, 1059
  thoracic gas volumes, 1059
Airway obstruction
  lung embolism, 387
  tracheostomy breathing, 92
Airway pressures
  maximal expiratory and inspiratory, 1017
Ajzen, H., 1175
